

Welcome to the World of MACADAMIA

The Estates for Generations
It's an Ocean of High ROI Opportunities..!

Brought to you by **Bahuvida**

Introduction

- > We, M/s. **Bahuvida Limited** take pleasure to introducing ourselves a Public Limited Company (CIN: U01100TG2012PLC079502) incorporated under Indian Companies Act 1956 in Hyderabad, Telangana, India.
- > We are an Integrated Agribusiness Company & India's First Macadamia & Bioleather Plantation Developer with conglomerated portfolios that includes Nurseries, Estates, Contract Farming, and Manufacturing.
- > Bahuvida Limited is a professionally managed company that believes in profitability, sustainability, and enjoyable long-term relationship with all our key-stakeholders.

About Us

We stand at the threshold of a new India, the country where dreams are realised, and lives are positively impacted. We are **Bahuvida Limited**, and we are making this new India happen.

Bahuvida Limited is at the forefront of the highly profitable agricultural estates development with use of super commercial and futuristic plantation such as Macadamia (World's Costliest Dry-fruit) and Cactus (Bioleather) with detailed market intelligence.

With extensive knowledge right from obtaining the permissions to saplings import, plantation, maintenance, pest management, growing, regular cuttings, staking, processing, finishing, logistics/supply chain management and selling in the domestic and global markets by using our physical commodity trade expertise where it is really demanded highly.

Core Strengths & What we do?

As the only Public Limited Company in the country focused on developing Macadamia estates, Bahuvida Limited leverages a PAN India and global network through its DGFT (Directorate General of Foreign Trade) license for exporting Macadamia products.

The company strategically procures land in prime locations, ensuring quick launches and robust developmental activities in line with Macadamia master plans, leading to extraordinary returns on investment (ROI) and significant profits.

Bahuvida is supported by a team of professionals, including geological and biological experts, AG scientists, AMS (Australian Macadamia Society) trained consultants, and realty advisors, who develop cost-effective ventures that deliver exceptional returns in a short timeframe.

The company manages the entire process from land procurement to property handover, providing 25 years of estate maintenance without additional charges to the estate owner after handover.

Bahuvida Limited is committed to supporting investors throughout their investment journey—whether short-term, mid-term, or long-term, acting as an extended partner in their wealth creation efforts.

About Macadamia

Introduction of Macadamia

- > Macadamia nuts are regarded as world's **costliest dry-fruit nuts** and one of the world's best eating nuts.
- > The plant is native of the sub-tropical forests (Queensland) Australia, and produces nuts with a white, creamy, highly valued kernel.
- > Macadamia nuts are **superior in flavor than other dessert nuts** and posses a higher aroma and finer, smoother flavor than the hazel nut, which it most closely resembles. The raw kernel though edible, is usually consumed after roasting.
- > The kernels are a good **source of vitamin B, calcium, phosphorus, and iron**. They have the highest amount of beneficial monounsaturated fats of any known nut
- > They also contain approximately **22% of omega-7** palmitoleic acid, which has biological effects similar to saturated fat.

South Africa is the world's largest commercial producer accounting for roughly 40% (i.e. approximately 77,000 metric tonnes of nuts in shell) per year produced globally.

“

India has considerable potentiality for commercial cultivation of this crop in many areas of tropical and subtropical regions with the suitable variety called Beaumont which has 100 years of tree life.

”

Climate, Soil & Varieties:

Macadamia **trees thrive in warm temperate** to tropical climates, ideally at altitudes up to 1,500 meters above sea level, and require minimal rainfall. They can be successfully cultivated in areas where other tropical fruits, such as mango, papaya, banana, and avocado grow well, typically yielding satisfactory results similar to Australia in suitable Indian regions. the species grow as small to large evergreen trees, **2 to 12 meters tall**.

They particularly benefit from fertile volcanic soils and alluvial areas near rivers and creeks, rich in humus, providing optimal conditions for growth.

In India, the suitable Macadamia species are **Tetraphylla** and **Integrifolia**, known for their excellent taste and high oil content, with **Beaumont** being the most **commercially successful** sub-variety recommended for large-scale estates worldwide.

Beaumont trees are distinguished by their dense, deep green foliage and fragrant pink flowers in spring, contributing to a high yield of delicious nuts.

These trees **flourish in deep, well-drained loams and sandy loam soils** with a pH range of 5.5 to 6.6, often in agro-climatic conditions similar to coffee cultivation.

Grafted sapling trees begin producing approximately **3-6 kg of nuts** per tree per year by the 3rd to 4th year, increasing to **90-110 kg per tree per year by the 15th year**, with a productive lifespan of 80-85 years; additionally, Beaumont nuts have shells that are easier to open, stack, and pack compared to other varieties.

Macadamia's & It's Utilization

Nut-in-shell

Macadamia Nut-in-Shell is well known as the best of the traditional in-shell tree nut varieties.

Having become widely consumed across Australia, China and other parts of Southeast-Asia it is now rapidly gaining traction across United States of America, Europe and India as a popular snack choice with consumers

Whether for re-distribution or to create their own fine products to FMCG companies, we wanted to offer a range of options to suit any global market from India by creating complete Macadamia ecosystem (i.e. right from plantation to export / plant to plate).

Macadamia's & It's Utilization contd.

Macadamias are not only delicious!

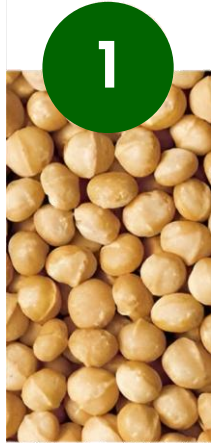

- > Macadamias are not only delicious, with a smooth buttery taste, they are also **extremely healthy**.
- > These two qualities make Macadamia's the **perfect ingredient to almost any food product**, in addition to instantly elevating the end product to a new level of healthy indulgence, and **premium positioning** and price.
- > We wanted to offer an extensive variety of kernels styles and grades to suit for global FMCG conglomerates.

Retail Packaging

- > If any FMCG company required for a **ready-to-eat retail product**, we can **offer a turn-key solution in** either **their own private label** (white labeling) or our own brand.
- > From simple or re-sealable pillow pack from 500g and 1,000g in a wide variety of material specifications, stand-up pouches from 100g to 500g in any specification. We get them covered!

Kernel Styles:

Style-0: It is a large whole kernel (generally 20mm or over) used primarily in premium quality snack products.

Style-1: These are whole kernels (generally above 16mm and 14mm respectively) used primarily in snack products, confectionery, and as an ingredient in premium food products.

Style-2 & 3: These are blends of whole and half kernels in various ratios that can be customized to suit a particular application or price point.

Style-4: These are smaller half kernels and large pieces. Also used in a wide range of snacks and ingredient applications, as an ingredient in confectionery, cookies, cereals, and cooking.

Style-5 to 7: These are kernel pieces with Style 5 larger pieces and Style 7 smaller pieces. These styles are mostly used as an ingredient in almost any application, including ice cream, baked products, confectionery, cereals, health bars, salads, and other serving food.

Health Benefits of Macadamia Nuts

Increasing Energy Levels

Macadamias are an abundant source of healthy fats and proteins. It helps in increasing the energy levels.

Market Scope & Investment Advantages

Market & Opportunity

Currently, there is a significant gap between demand and supply for Macadamia nuts in the Indian market, positioning India as a potential powerhouse in global Macadamia trade, driven by increasing health-consciousness worldwide.

Macadamia farming is expected to become a crucial contributor to India's economic growth in the coming years, with substantial increases in domestic production anticipated.

Bahuvida Limited plans to establish a comprehensive Macadamia ecosystem, which includes importing seeds, developing nurseries, grafting with mature plants, and supplying saplings, as well as offering plant care, pest control management and post harvest handling services.

Market & Opportunity contd.

The company will manage the entire process from post-harvest handling to processing, packaging, and selling Macadamia nuts under its own brand in both domestic and international markets.

This initiative will enable horticulture farmers across the country to plant and trade their entire crop with Bahuvida, creating vast investment opportunities ranging from small to large-scale ventures.

Why this is the Right Time to Invest?

Hyderabad is at the helm of massive growth. While the real estate market is sluggish in a ton of other major cities across the country, it is flourishing in and around capital of Telangana, with the radius of 150km from the ORR. And for you Investor(s), it's the right time to take a shot at it.

Achieving your future financial goals is a long-term process and there are several ways in which you can build strong wealthy assets.

Investing in **Bahuvida Limited's Macadamia Estates** is one of the best methods to multiply your net-worth in short period of time. From an investor perspective, this is fueling a momentum in the demand for commercial agriculture properties where you can gain maximum returns in short period of time when compared with other available investment options.

All strengths and fundamental business factors are serving well in terms of providing higher returns on investment while benefiting the nature. For those looking to buy a piece of land for their "Dream Property" Bahuvida Limited offers all the right ingredients for a life that is comfortable and financially fulfilled.

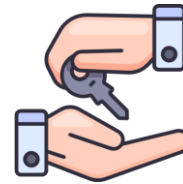

Why Choose “Bahuvida” in the Market?

Bahuvida Limited aims to become the country's leading and sustainable Macadamia estates developer, committed to deliver high returns to its investors and stakeholders while benefiting the nature.

Adoption of best business practices (like Real Estate) in domestic market will help to protect the company's long-term returns on investments.

Since inception, we have been able to successfully attain remarkable position in the construction and farmlands development sectors due to our capability to deliver qualitative ventures with utmost satisfaction guarantee.

Moreover, we as a company are also highly appreciated by our customers and investors because of our ethical and transparent business practices

Quality services, efficient manpower, execution style, industry leading prices, time constrain deliveries are the Bahuvida Limited's major strengths.

Backward Integration

Bahuvida Limited is the 1st Indian company who involved in the Macadamia estates development in the country.

Through our global seed and saplings sourcing network, strategic importing capability of grafted plants, today we are monopoly in the Macadamia estates development in the country.

We are also able to offer wide assortment of Macadamias from multi-origins for those who wants to import from other countries to India.

We merge the best by revolutionizing Macadamia plantation that harnesses nature without harming an inch of it.

Our estate planning and implementation is well-aligned with further primary distribution of the carbon credits through reputed exchanges across the globe, thus ensuring an extraordinary added value from the 5th year of the each estate.

Bahuvida Limited's Business Verticals

At, **NURSERIES WING**, we develop grafted varieties of Macadamia Saplings and grow the same upto 2 years after germination of the seeds. After that, the 2 years old Grafted Macadamia Plants will be planted in our Estates; and also, we sell in the open market for our Contract Farming farmers who associated with us.

At, **ESTATES WING**, we develop Macadamia Estates at suitable areas in the states of Telangana, Andhra Pradesh and Karnataka. The estate lands will be well developed with Macadamia Plantation, Drip Irrigation System, Electricity, Roads, Boundary wall/Fencing, Arch, Security, Quarters, Lab, Store, Bore-wells, Motors, Machinery, Agricultural Tools and Tackles etc. After complete development of the Estates we sell the developed estate lands to enthusiastic investors and we maintain the same on behalf of them with our own cost on revenue sharing basis.

At, **CONTRACT FARMING WING**, we supply highly matured and qualitative Macadamia plants to all of the Horticulture farmers who are interested in the farming of Macadamia on buy-back basis. Not only supply of the plants but also support technically in regular growing practice of the Macadamia at their farm field through our Agronomists for the better yielding. After that, we buy the Macadamias from them at their farm-gate as per the price given by us at the time of buy-back agreement.

At, **MANUFACTURING WING**, we collect Macadamia Nuts from our Estates and also from our Contract Farming wing; and we process the same in our own Macadamias Process Plant, right from de-husking, removal of hard wood shell, collecting the Macadamia Kernels, size sorting and roasting; exporting it to global markets in bulk and also we supply Macadamias in consumer packaging size from 100-500 grams on our own brand which will be available online and offline markets in India. We also pack and supply Macadamias on third-party brands who are multi-national FMCG companies on regular basis.
